How much does it cost?

Laser use is charged at £10 per hour of contact time.

Contact time is defined as from turning on the laser to turning it off at the end of the job.

The fee is also due for the contact time during training. Training time depends on the experience the member already has, but will be a minimum of at least three hours.

Why do we charge?

As well as energy costs, the Hackspace needs to cover the cost of maintenance and repairs.

Example costs for information are:

- Lens replacement
- Tube replacement
- Cleaning materials
