

Introduction

Leicester Hackspace has a Piranha Ruida CO₂ laser which was donated after it was seriously damaged by a fire caused by unattended cutting of acrylic. Members have coaxed it back into use. It has a number of idiosyncrasies as a result, so it is important that members are trained beforehand or supervised whilst using the laser.

Summary:

- Laser type: CO₂
- Power: 100W
- Model:
- Bed size:
- Cutting area:
- Software: RDWorks v8
